This is a large-scale ASCII art representation of the map of China. The map is constructed using a variety of characters, including 'X', 'R', 'V', 'B', and '0', which are arranged to form the geographical outline and internal features of the country. The map is oriented with North at the top. The right side of the map is partially cut off by the edge of the image.

This is a large ASCII art image of a map of China. The map is composed of various characters, including 'X', 'R', 'V', 'B', and '0', which are used to represent different geographical features and the landmass itself. The map is oriented with North at the top. The right side of the map is partially obscured by a large block of zeros and some special characters, suggesting a truncated or corrupted version of the original image.

Diagram illustrating the construction of a 2D array from 1D arrays. The left side shows a 1D array $[2, 2, 2]$ being repeated to form a 2D array of shape $(3, 5)$. The right side shows a 1D array $[2, 2, 2]$ being repeated to form a 2D array of shape $(3, 5)$.
